

For Immediate Release

MUTOH eco solvent ink now comes in a new color "ORANGE" Delivers rich expression and vivid color development

MUTOH INDUSTRIES

MUTOH INDUSTRIES LTD., a leading manufacturer of wide-format inkjet printers, affiliated with MUTOH HOLDINGS CO., LTD. today announced the release of the new color "ORANGE" for the MS41 ink used in the XpertJet 1682SR, a dual printhead high-speed inkjet printer that delivers high image quality and high productivity.

Orange ink expands the color gamut for rich expression

The combination of the eight-color configuration including the new orange color and "MUTOH CMYK Expanded", which is an orange-compatible wide gamut profile, included in VerteLith ver.3, significantly expands the yellow to magenta color gamut with a focus on the orange region.

This expands the color reproduction area, resulting in "richer expression" and "vivid color development". It is now possible to vividly express the freshness of foods and fruits.

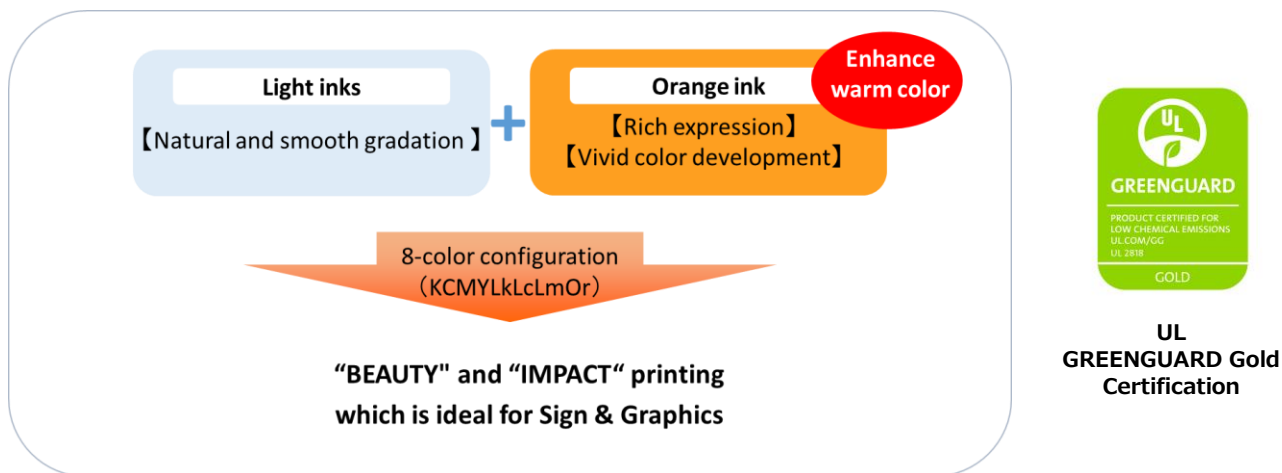

【with orange ink】

Clearer and more vivid colors

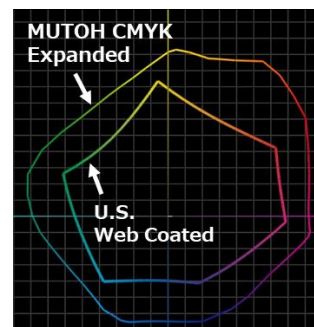

【without orange ink】

The 8-color configuration of the XpertJet 1682SR delivers "natural and smooth gradation" with light inks, and also "rich expression" and "vivid color" by enhanced warm colors with orange ink, resulting in printing with "BEAUTY" and "IMPACT" that is ideal for Sign & Graphics.

MUTOH genuine RIP software "VerteLith"

VerteLith ver.3, which supports orange ink, comes standard with "MUTOH CMYK Expanded," an input profile that maximizes the capabilities of the eight-color configuration with the addition of orange ink.

<Specifications>

Product name	Eco solvent ink "MS41 Orange"
Capacity	300ml
Model name	MS41-OR300U/ MS41-OR300E
Supported printer	XpertJet 1682SR
Release date	Sep. 30, 2021

*VerteLith, the genuine RIP software, is required to use orange ink.

MUTOH will make continuous efforts to meet diverse needs of their customers by introducing new products to the market.
